Emigration in Lebanon

Actual figures were gathered on Lebanese Emigration (i.e. numbers and destinations) to the USA, Canada, Australia and Europe through contacting embassies and governmental institutions concerned with emigration and reviewed their statistics. However, the second part of the study focused on the characteristics of emigrants and emigration visa applicants.

The study was complemented with a survey with 1,087 Lebanese families composed of 5,890 individuals to study their profile, country of destination as well as the main reasons behind emigration.
